EDUCATION

Western University & Ivey Business School

3.7/4.0 CPGA | Sept. 2020 – Apr. 2026 | London, ON

BSc. In Honours Computer Science and HBA. In Honours Business Administration

WORK EXPERIENCE

Wealthsimple, Software Development Intern – Managed Investing

May. 2025 – Aug. 2025 | Toronto, ON

- Shipped Target Date Portfolios by building on account creation and investment infrastructure using **Ruby**, **Kafka** and **GraphQL** and creating our web flow using **React**, enabling \$100M in deals
- Supported the creation of DPSP accounts and onboarding of employers onto group plans by handling new employer-specific use cases, leading to an increased onboarding speed of 33%
- Built an onboarding chatbot which answered 25+ questions for 6 group plan admins, unblocking sales and engineering from receiving repetitive EOC tickets and reducing the burden of onboarding new employers
- Resolved 7+ engineering on-call (EOC) tickets and performed build testing to ensure release reliability

Wealthsimple, Software Development Intern – Payments

Jan. 2025 – Apr. 2025 | Toronto, ON

- Developed an efficient X9 file generation sidekiq worker in **Ruby**, used to convert up to 10k cheque deposits into a bank-processable format for a third party, processing \$100M annually
- Spearheaded the addition of cheque deposit activities by managing multiple state machines utilizing our event-driven architecture using **Ruby on Rails**, **Kafka** and **GraphQL** and working alongside design and product to improve the user's experience, enabling 3M users to track cheque deposit statuses
- Enabled FX currency conversion between accounts by extending upon internal payment rails and building the web and mobile flows with **React/React Native** 30% ahead of schedule and allowing \$200k+ in additional conversions
- Proactively strengthened test coverage by developing and updating 20+ automated tests for web (Playwright) and mobile (GPTDriver), improving release reliability and maintainability for our payment flows
- Collaborated with 8 engineers, PMs and designers to deliver in an agile environment involving daily standups

Citibank, Software Development Intern

May. 2024 – Aug. 2024 | Mississauga, ON

- Released a full-stack app using **Spring Boot**, **Java**, **Angular**, **Typescript** and **Microsoft SQL Server** to provide tooling for removing, restoring and transferring user preferences for a fixed-income trading platform
- Streamlined internal processes for handling technical support requests by Citi traders, boosting workflow efficiency for this process by 67% for 44 technical support staff and developers
- Modernized 3 feature-rich components displaying critical trading information by migrating them from KnockoutJS, JQuery and JavaScript to **Angular** and **Typescript**, and integrating with a more reliable internal data provider

Develop for Good, Software Engineering Intern

May. 2024 – Sept. 2024 | San Francisco, CA (Remote)

- Built an HTTP REST API for an admin dashboard used to manage therapist and user profiles using **TypeScript**, **Express**, **Sequelize** and **MySQL**, saving \$20k+ in technical contractor and external admin portal fees
- Designed and developed an admin portal's frontend using Figma, **React**, and **Material UI** to the user's specification

Capco, Data Analyst Intern

May. 2023 – Aug. 2023 | Toronto, ON

- Analyzed 60,000+ data records to build **Excel** project management dashboards to visualize the status of 30+ software migration projects, saving \$15k+ in salaries by eliminating 300+ annual work hours
- Programmed data analysis scripts using **Python** to extract insights on the changing organizational structure of a \$1B digital transformation project for presentations to senior leadership

PROJECTS

Cryptomate: Automate Your Cryptocurrency Trades, Java, SQL, SQLite, HTML + CSS

[GitHub](#)

- Utilized CoinGecko to create a mock trading platform, allowing automations to buy and sell cryptocurrencies
- Developed a three-tiered architecture and used Factory Method, Strategy, Observer & proxy design patterns

SKILLS

Languages: Ruby, Python, Go, Java, TypeScript/JavaScript, SQL, HTML + CSS

Frameworks: Ruby on Rails, Kafka, React, React Native, Angular, Node, Spring Boot, Express, GraphQL

Libraries & Tools: PostgreSQL, MongoDB, AWS, Figma, Jira, Git, Datadog, Mixpanel, Playwright, Sidekiq, Sentry
